

Enduro Shield™ for glass is a permanent non-stick, protective coating for use on glass surfaces. The invisible coating protects against staining etching and corrosion and makes the glass water repellent and stain resistant.

Enduro Shield™ also protects glass from sea salt, bird droppings, pollution, grime, dirt and soap scum as well as making fingerprints easier to clean.

HOW IT WORKS

Enduro Shield™ acts as a permanent shield to seal the porosity of the glass, helping prevent the deterioration caused by etching and corrosion and allowing contaminants to reside on an easy to clean protective coating.

Enduro Shield™ is only two molecules thick and is completely invisible, unlike traditional surface coatings there is nothing that will crack or discolour **Enduro Shield™** over time.

CARE & MAINTENANCE

Maintenance cost are significantly reduced as **Enduro Shield™** creates a permanent non-stick coating which reduces the time spent cleaning by up to 90% and increases time between cleans. Surfaces are easily maintained using clean water and a microfiber cloth eliminating the need for expensive cleaners and preventing the early repair or replacement due to pre-mature weathering.

Enduro Shield™ is appropriate for all glass surfaces but typically on:

- Glass Balustrades
- Windows
- Shower Screens
- Mirrors
- Pool Fencing
- Glass Splashbacks
- Glass Roofing & Skylights

To maintain your glass to the best possible standards we recommend following these easy maintenance steps:

- Ensure that glass is rinsed regularly with clean water
- Wipe glass with microfiber cloth
- To achieve superior results finish up by drying the glass

It is recommended that the glass be wiped down regularly to ensure that deposits do not excessively build up and to ensure continuance of an easy cleaning environment.
