**POOL WALLS** are custom engineered to specific requirements.

# Where beauty meets precision

Cooling Brothers provides a diverse range of energy efficient glass solutions that suit architectural demand and building requirements. Glass is manufactured to Australian standards to ensure no compromise in safety and guarantee customers high quality satisfaction.

The company can supply and design custom engineered pool walls and windows and has a comprehensive range of balustrade and pool fencing. Specialising in frameless glass solutions, Cooling

Brothers now use custom toughened laminated glass for its range of frameless balustrade systems to eliminate the requirement of handrails, offering a true frameless system.

The ocean break marina concept is the first revolutionary design of its kind, providing an engineered wind and impact-resistant design for both patrons and cliental, providing protection, comfort and an assured level of quality.

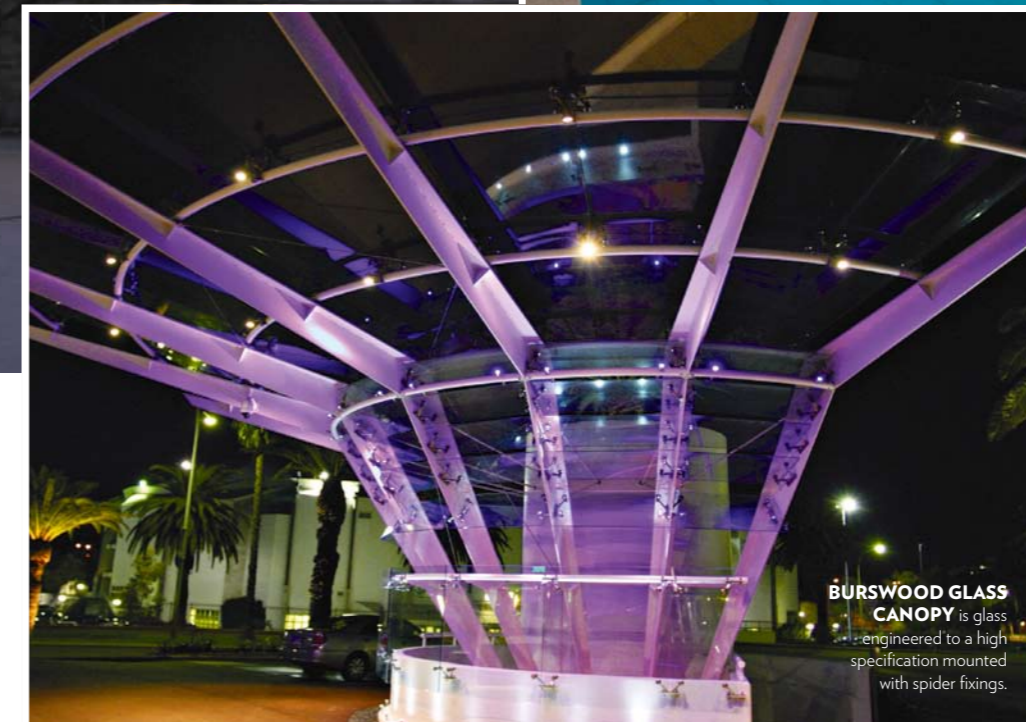

Specifically designed to achieve high levels of weather

protection using high marine grade stainless steel and architecturally engineered glass, the system is custom made to suit the environment.

Cooling Brothers also specialises in offering larger spans of glass particularly for shopfront glazing, allowing clients to increase visibility of store products.

The Kings Park retail outlet is a striking example with increased sized glass panels offering vast natural lighting and uninterrupted views attracting customers to the showroom.
